

Waseem Sajjadh

Senior Full-Stack Engineer

Puttalam, Sri Lanka · (+94) 77-54-77165 · wsajjadh@gmail.com · linkedin.com/in/wsajjadh

Professional Summary

Senior full-stack engineer and tech lead with 7+ years of experience building SaaS platforms, CRMs, and automation systems. Strong background in Laravel, Node.js, and React/Next.js, with a track record of improving performance, rebuilding legacy systems, and delivering stable, scalable applications.

Increasingly focused on AI-assisted development workflows — orchestrating multiple AI agents and spec-driven processes to accelerate delivery and enforce engineering standards across teams. Comfortable leading technical work, mentoring developers, and working directly with stakeholders. Known for solving bottlenecks, shipping clean code, and delivering on time.

Core Skills

- **Backend:** Laravel, Node.js, Express.js, REST/GraphQL
- **Frontend:** React, Next.js, Vue.js, TypeScript, SSR, Zustand/Redux
- **Database:** PostgreSQL, MySQL, MongoDB, Redis, Firestore
- **DevOps:** Docker, AWS (EC2/S3/RDS, Lambda), DigitalOcean, Nginx, CI/CD
- **AI-Assisted Development:** Claude Code, OpenAI Codex, multi-agent orchestration, BMAD Method, OpenSpec, spec-driven development (SDD)
- **Automation:** Make.com, Zapier, Puppeteer, Selenium, Playwright
- **Practices:** TDD, Clean Architecture, Code Reviews, Agile/Scrum
- **Payment Gateways:** Card, Crypto, E-Wallet

Professional Experience

Tech Lead — Finovation Tech

April 2026 – Present | Remote

- Lead technical direction for a Laravel-based fintech CRM platform, owning architecture, workflow standards, and delivery across the team.
- Built multi-agent development workflows using Claude Code and Codex, orchestrating specialized AI agents across spec, planning, and implementation phases to ship complex features reliably.
- Drove adoption of spec-driven development (BMAD Method + OpenSpec) across the team, making specifications the source of truth for AI coding agents and reducing rework.
- Established AI-assisted engineering standards, enforcing consistent architecture and workflow practices across

developers working in parallel.

Stack: Laravel, Next.js, React, PostgreSQL, Flutter, Claude Code, Codex, BMAD, OpenSpec, Payment Gateways, CI/CD

Senior Software Developer — Imara Software Solutions

2022 – 2026 | Puttalam, Sri Lanka

- Fixed a major React performance issue for 100k+ row datasets, cutting processing time from 8+ minutes to 45 seconds.
- Rebuilt a legacy CRM with Laravel + React, improving API performance by 70% and reducing support tickets by 40%.
- Delivered 20+ client projects with a 98% satisfaction score and no missed deadlines.
- Set up code review workflows and mentored junior developers, reducing production issues by 25%.
- Built 12+ Make.com/Zapier automation flows saving clients 15+ hours/week.
- Worked directly with business teams and executives to clarify requirements and plan technical work.

Stack: Laravel 9/10, React, Next.js, PostgreSQL, Redis, Docker, AWS, Nginx

Software Developer — VM Webs

2021 – 2022 | Remote (Canada)

- Migrated a large WordPress site to Laravel + React SPA, improving page speed by 65% and cutting hosting costs by 80%.
- Built a real-estate CRM with map-based search for 50k+ listings with sub-second lookups.
- Implemented Stripe billing with retry logic, reducing failed payments by 35%.
- Set up GitHub Actions CI/CD, cutting QA time by 40%.
- Upgraded a PHP 5.6 codebase to Laravel 8, improving maintainability and team velocity by 30%.

Stack: Laravel 8, React, Vue.js, MySQL, Stripe, Google Maps API, GitHub Actions

Full-Stack Developer — Adsflycircle

2017 – 2021 | Puttalam, Sri Lanka

- Built a Puppeteer-based automation engine with a 95% success rate bypassing Amazon bot detection.
- Developed a React Native app and Laravel backend supporting 200+ concurrent users.
- Reduced API response time from 1.2s → 400ms by fixing N+1 issues and improving indexing.
- Integrated 8+ external APIs for shipping, payments, and inventory with solid error handling.
- Built automated order sync, bulk import, and inventory tools used daily by 300+ active sellers.

Stack: Laravel 5.6–8, React Native, Node.js, MySQL, MongoDB, Firebase, Puppeteer

Early Career

- **Administrative Executive — Saudi Aramco (2015 – 2017):** Digitized and automated team workflows, reducing manual work by 95%.

- **Trainee Web Developer — Silver Rays Tech (2014 – 2015):** Assisted in backend/frontend development and learned core engineering fundamentals.

Education

- **Web Development Intensive — Ecoz Labs (2013)**
- **Diploma in Network Administration — WinSYS Networks (2011)**
